AED CABINETS

ROTAID SOLID PLUS HEAT

PRODUCT SHEET

The Rotaid Solid Plus Heat is an innovative AED wall cabinet that ensures a recognizable and robust storage of your AED device. The characteristic round shape and green colour, make it easy to be found and recognized and comes with a high quality appearance. The large AED logo, positioned in the transparent centre of the cover, leaves no room for interpretation. This is a life saving device.

The cabinet can be opened by an intuitive twist that removes the whole cover. The responder therefore has full access to the AED that hangs via a bracket for a quick and easy grab. The cover is attached to the back plate via a belt and needs no further attention from the responder. A stainless steel hook, attached to the bottom of the cabinet, can hold a seal, tag or other appliance.

The cover, equipped with recesses for an optimal grip and directive arrows, is made from 100% Polycarbonate. With a thickness of 5 millimetres it offers a solid protection and ensures a high grade of water- and dust resistance. Furthermore, the cover is fitted with UV filters, to protect from direct and indirect sunrays. Appearance decay, rust and accumulation of residue are excluded.

A tailor made heating device maintains an inside temperature of at least 5 Degrees Centigrade even when temperatures drop to -25 Degrees Centigrade. The automatic and gradual operation makes it particularly effective and efficient. The element should only be equipped with a power plug and needs no external power supply.

The materials are tested in the outdoors and provide a long lasting protection of the AED.

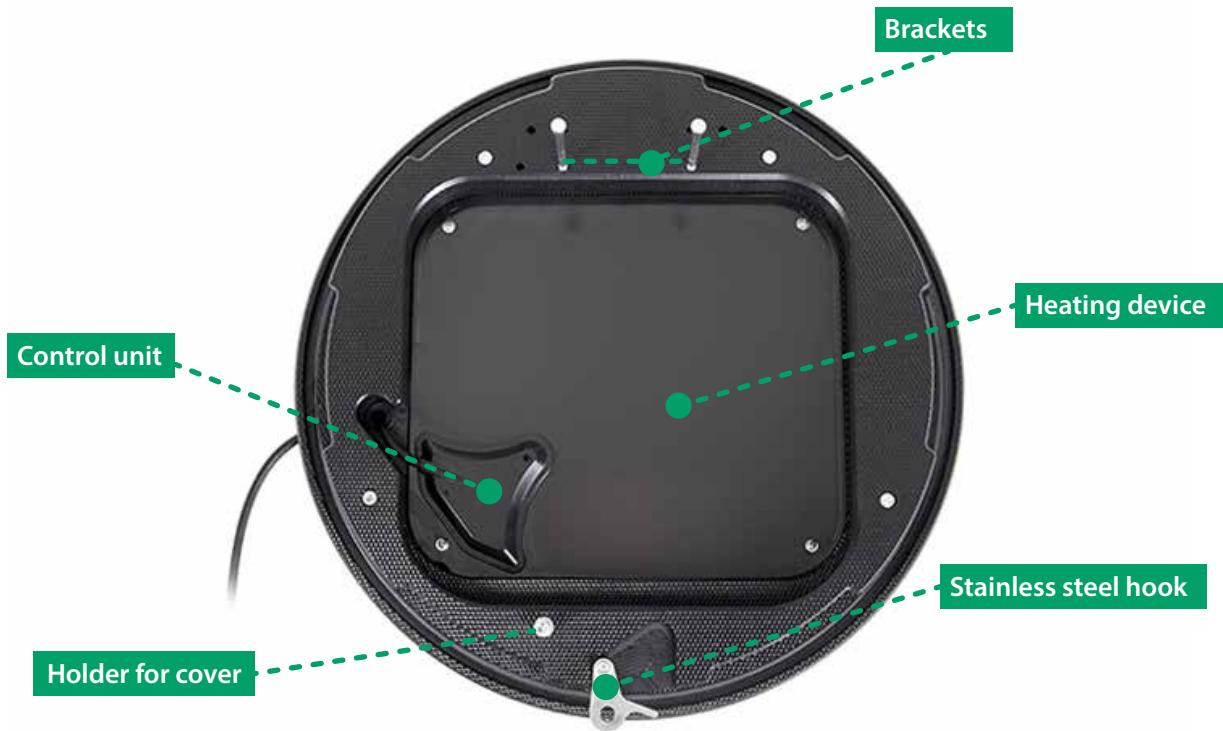

**VERY LOW
POWER
CONSUMPTION**

**FULLY AUTOMATIC
OPERATION**

**OPERATIONAL AT
TEMPERATURES
AS LOW AS
-25°C**

ROTAID SOLID PLUS HEAT

TECHNICAL DETAILS

The back plate is made from 100% HDPE plastics and offers space and protection to practically all types of AED devices on the market.
